Yifei Sun

Newark, DE | 302-602-3889 | yifei.sun42@gmail.com | iffy-sun.github.io

PROFESSIONAL SUMMARY

Quantitative analyst with an M.S. in Statistics and hands-on SAS and SQL experience developing reproducible data processing and calculation programs. Experienced in translating business requirements into programming logic, integrating complex datasets, validating results, and documenting deliverables in a regulated banking environment.

TECHNICAL SKILLS

Programming & Tools: SAS/SAS Viya, SQL, R, Python, Snowflake, Teradata, Git, Alteryx, Excel

Data & Quality: Data integration and cleaning, reconciliation, quality control, UAT, process automation, technical documentation

PROFESSIONAL EXPERIENCE

JPMorgan Chase & Co. *Wilmington, DE*

Card Corrections Quant Analytics Associate Jul 2026–Present

- Develop case-specific SAS programs for end-to-end credit card corrections, including affected-account identification, refund and interest calculations, and preparation of account adjustment files.
- Investigate historical business rules and source data, define account selection criteria and calculation logic, and confirm requirements with business stakeholders.
- Integrate and transform data from multiple sources using SAS; validate outputs through account-count and financial-total reconciliations, boundary-condition checks, and sample recalculations.
- Maintain and enhance existing SAS macros for recurring calculations and account-status checks. Deliver correction files, summary reports, and supporting documentation; explain results to stakeholders and reconcile post-execution outcomes.

Card Pricing & Interchange Analytics Intern Jun 2025–May 2026

- Analyzed credit card data using SAS Viya, SQL, Snowflake, and mainframe sources to monitor daily pricing processes, investigate exceptions, and support issue resolution.
- Performed reconciliation, QC, and UAT across multiple systems to validate pricing strategies and remediation activities against business requirements.
- Built reusable SAS and SQL templates for recurring analyses and translated pricing requirements into structured test scenarios, documented findings, and stakeholder-ready results.

Zhongyuan Bank Co., Ltd. *Zhengzhou, China*

Internal Auditor Nov 2018–Jul 2024

- Conducted risk-based audits of credit card and consumer-finance operations; analyzed operational and customer data to identify control gaps, investigate root causes, and recommend improvements.
- Collaborated with finance, risk, and technology teams to validate findings, document business impact, communicate recommendations, and track remediation through completion.

Earlier Roles: Customer Manager; Bank Teller Jul 2016–Nov 2018

EDUCATION

University of Delaware | M.S. in Statistics May 2026

Zhengzhou University | Master of Business Administration Jul 2023

Chongqing Technology and Business University | B.Econ. in Public Finance Jun 2016
