Skills

- **Programming and Tools:** R, SAS, Python, Git, MySQL
- **Financial Expertise:** Skilled in financial reporting, data analysis, and accounting in the banking industry.
- **Communication:** Clear and effective communication with teams and clients.
- **Teamwork:** Collaborated with cross-functional teams to achieve goals.
- **Multitasking:** Managed multiple tasks simultaneously with precision.

Class Projects

Crime Trend Analysis and Prediction in Connecticut

- Used SAS to analyze crime trends and socioeconomic factors, identifying income, unemployment rate, and population size as key drivers.
- Built regression models to predict crime rates, achieving an R-squared above 0.9 for segmented town groups.

Cirrhosis Prediction and Analysis

- Regression analysis on a liver disease dataset using R.
- Built and refined multiple linear regression models to predict patient survival, identifying key predictors such as bilirubin levels, albumin levels, and disease stage.
- The results revealed that bilirubin, albumin, and disease stage were the most significant predictors, providing information for early intervention strategies.

Work Projects

Credit Card Business Audit

- Conducted a comprehensive audit of the bank's credit card operations, including application processing, risk assessment, and post-loan management.
- Identified deficiencies in predictive model development and post-loan monitoring processes, enabling better risk mitigation and performance tracking.
- Applied data analysis techniques to evaluate trends and devise strategies to enhance credit card marketing effectiveness and drive business growth.

Bad Debt Write-off Audit

- Analyzed bad debt write-off cases across multiple fiscal years to identify patterns and ensure compliance with regulatory requirements.
- Assessed the efficiency and fairness of resource allocation in write-off processes, ensuring alignment with internal policies and industry standards.
- Presented detailed findings and recommendations to enhance the transparency and legality of bad debt management practices.

Consumer Finance Company Business Audit

- Reviewed the end-to-end operations of a consumer finance company, including loan origination, underwriting, disbursement, and collections.
- Identified critical gaps in regulatory compliance and operational inefficiencies; provided recommendations for policy improvement and workflow optimization.
- Supported the development of improved business regulations and procedures to ensure sustainable and compliant growth in financial services.
