Professional Summary

Data-driven analyst with training in Statistics (M.S.) and prior experience in financial services, supporting pricing, risk, and operational decision-making through data validation and analytics. Seeking an analytics-focused Business Analyst role where data insights drive measurable business impact.

Education

M.S. in Statistics | University of Delaware | Expected May 2026

Master of Business Administration (MBA) | Zhengzhou University | Sep 2021 - Jul 2023

B.Econ. in Public Finance | Chongqing Technology and Business University | Sep 2012 - Jun 2016

Exchange Program | University of Lincoln, UK | Sep 2014 – Jan 2015

Technical & Analytical Skills

- **Programming & Analytics:** Python, SQL, SAS, R, Git, Alteryx
- **Data Analysis & Modeling:** Data cleaning, regression, predictive modeling
- **Business & Financial Analysis:** Financial Data Validation, Business Process Auditing, KPI Monitoring, Risk & Compliance Analysis
- **Core Competencies:** Quantitative Problem-Solving, Cross-functional Collaboration, Technical Reporting, Detail-Oriented

Professional Experience

Intern, Pricing & Interchange | JPMorgan Chase & Co., Wilmington, DE | Jun 2025 – May 2026

- Designed and executed SAS and SQL queries to support ad hoc data requests, customer remediation cases, and project-level data validation across end-to-end execution workflows.
- Built data validation and reconciliation scripts from scratch for DVT initiatives, independently coding and cross-validating results with Data Analytics teams to ensure consistency and data integrity.
- Enhanced and extended existing SAS/SQL workflows for standardized customer issue handling, combining automated checks with required manual validation to ensure accurate execution on sensitive banking transactions.

Internal Auditor | Zhongyuan Bank Co., Ltd., Zhengzhou, China | Nov 2018 – Jul 2024

- Conducted data-driven audits of credit card and consumer finance operations, identifying process deficiencies and improving post-loan monitoring efficiency.
- Applied analytical techniques to evaluate business trends, leading to recommendations that enhanced risk mitigation and operational performance.

- Collaborated with finance, risk, and IT teams on cross-functional projects, demonstrating ability to bridge technical and business domains.

Customer Manager | Zhongyuan Bank Co., Ltd., Zhengzhou, China | *Jul 2018 – Nov 2018*

- Coordinated with team members to provide comprehensive services to corporate clients.
- Built relationships with corporate clients through effective communication and service.

Bank Teller | Zhongyuan Bank Co., Ltd., Zhengzhou, China | *Jul 2016 – Jul 2018*

- Assisted in staff management, training, and ensuring adherence to business processes.
- Assisted the accounting supervisor with daily tasks, ensuring quality accounting and analysis.
- Coordinated counter cash transfers within the jurisdiction of Zhengzhou.

Data & Analytics Projects

Predictive Modeling: Wine Quality Analysis | *Python (Scikit-learn, Pandas, NumPy)*

- Engineered an end-to-end machine learning pipeline to predict a quality score from 11 highly correlated physicochemical features.
- Implemented and compared multiple models (Partial Least Squares, Random Forest, SVM, Neural Network); optimized Random Forest model reduced prediction error by 40% vs. baseline.
- Conducted feature importance analysis to identify key drivers (alcohol, density, sugar), providing interpretable insights from a complex model with a reproducible modeling and evaluation pipeline.

Crime Trend Analysis | *SAS*

- Performed regression analysis on socioeconomic data to identify key drivers of crime rates, achieving high explanatory power ($R^2 > 0.9$) for segmented groups.

Certifications & Awards

- Qualification Certificate of Banking Professional (Personal Wealth Management) | 2021
- Associate Financial Planner (AFP) | 2018
- Merit Student, Zhengzhou University | 2021
